

WFUMB COE Annual Workshop: A new view of the liver: Moving From Conventional Ultrasound to Multiparametric Evaluation

Moderatori: Ioan Sporea, Alina Popescu – *Session 1*

- **08:30 - 08:45** - Multiparametric ultrasound (MPUS) or “the many faces” of ultrasonography (*Alina Popescu, Ioan Sporea*)
- **08:45 - 09:05** - Conventional ultrasound – the first step in the evaluation in diffuse liver diseases? (*Cătălina Mihai*)
- **09:05 - 09:25** - New advances in Ultrasound based evaluation of liver steatosis (*Ioan Sporea*)
- **09:25 - 09:45** - Ultrasound based elastography: is this the answer for liver fibrosis assessment? (*Alina Popescu*)
- **09:45 - 10:00** - Discussions

Moderatori: Mirela Dănilă, Larisa Săndulescu – *Session 2*

- **10:30 - 10:50** - Multiparametric ultrasound for the evaluation of benign focal liver tumors (*Roxana Şirli*)
- **10:50 - 11:10** - Multiparametric ultrasound for the evaluation of malignant focal liver tumors (*Mirela Dănilă*)
- **11:10 - 11:30** - Multiparametric ultrasound for the evaluation of fluid focal liver lesions (cysts, abscesses) (*Larisa Săndulescu*)
- **11:30 - 11:50** - Vascular liver pathology – the role of conventional and contrast enhanced ultrasound (*Ana Maria Ghiuchici*)
- **11:50 - 12:00** - Discussions

Moderatori: Roxana Şirli, Ioan Sporea – *Session 3*

- **14:00 - 14:20** - Ultrasound guided interventional diagnostic procedures in liver pathology (*Tudor Moga*)
- **14:20 - 14:40** - Ultrasound guided interventional therapeutic procedures in liver pathology (*Zeno Spârchez*)
- **14:40 - 15:00** - Endohepatology – when and how? (*Adrian Săftoiu*)
- **15:00 - 15:20** - The role of AI in ultrasound in liver diseases (*Ioan Sporea*)
- **15:20 - 15:30** - Discussions
